

This presentation represents the preliminary strategic direction of a multi-year, whole-of-government, U.S. strategy to address food security in a Feed the Future country or region. It describes partner country progress and outlines how U.S. investments will align in support of partner country priorities. This document has not yet been approved or funded but will form the basis of a multi-year strategy in development.

Strategic Review Outline

Country Context

- Food Security Situation
- Country Ownership
- Donor Coordination

USG Strategic Decisions

- Target Region
- Highest Potential Value Chains
- Nutrition and Decentralization

Planned USG Investments

Expected Honduras Feed the Future (FTF) Results

Embassy Tegucigalpa has a Strong Whole-of-Government Team Fully Engaged in Supporting the FTF Initiative

	Agency	Role	Programs
	State	Lead FTF Diplomatic Efforts Lead on FTF Policy Dialogue	Pathways to Prosperity WHA Climate Initiative
USAID	USAID	 Coordinate FTF In-Country Team Implement USAID FTF Program 	Food Security Program Regional FTF Program
USDA	USDA	Assistance to Ministry of Agriculture Linkages with U.S. Agribusiness	Food For Progress Regional Sanitary and Phytosanitary Program
	MCC	 Lead Compact Implementation Evaluate Compact Eligibility 	1st Compact Closed-out 2st Compact Eligibility
*	Peace Corps	 Leverage Volunteer Programs in Support of FTF Objectives Strong Volunteer Placement in Target Region 	Health Small Business Protected Areas
*	U.S. Military	 Milgroup Development Program Builds Schools, Health Clinics Supports Disaster Responses 	 Community Infrastructure Program (Schools / Clinics) Medretes

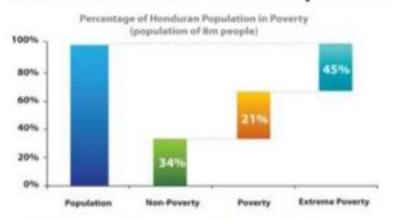

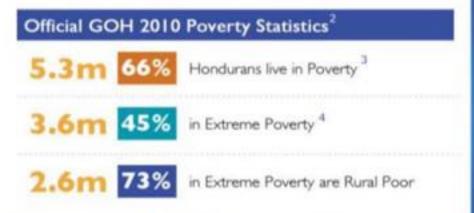

USG Strategic Decisions

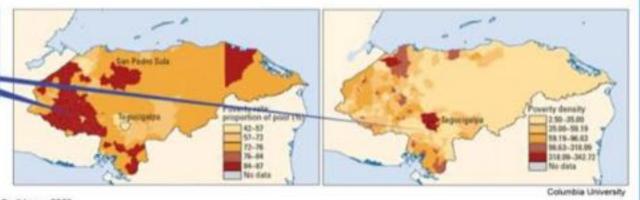

Planned USG investments

Honduras is One of the Poorest Nations in the Western Hemisphere

Rural Poor are Concentrated in the West and South

- 1. UNDP Economic Commission for Latin America and the Caribbean, 2009.
- 2. Instituto Nacional de Estadística (INE), 2010
- UNDP/Honduras: Income below the cost of the basic package of goods (food) and services, such as education and health.
- 4. UNDP/Honduras: Income below the cost of the basic package of food. This is the GOH statistic used by UNDP/Honduras to measure MDG1 progress.

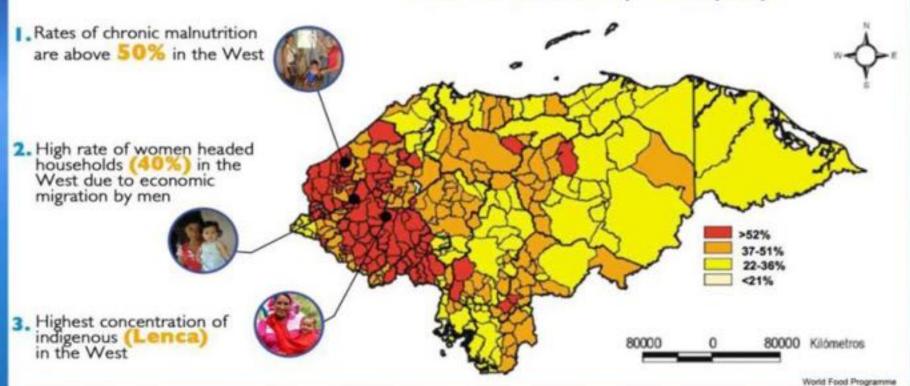

USG Strategic Decisions

Planned USG Investments

Chronic Malnutrition and Vulnerable Groups are Concentrated in Western Honduras

Child Malnutrition by Municipality

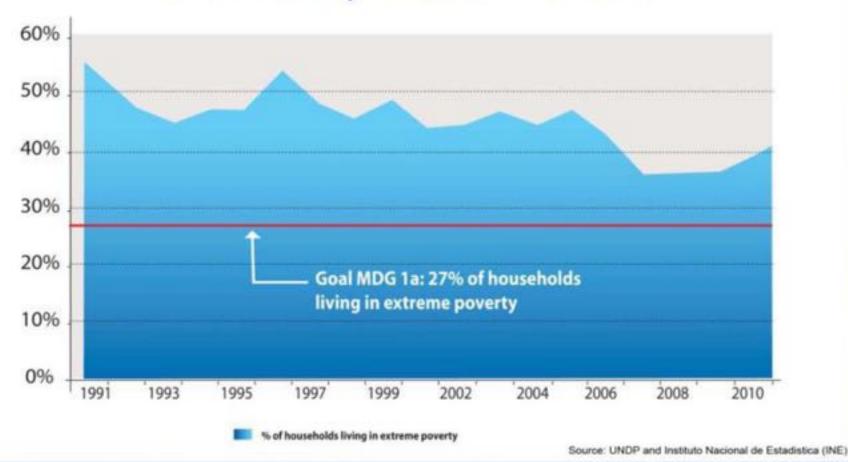

USG Strategic Decisions

Planned USG Investments

MDG1 Poverty Goals for Honduras

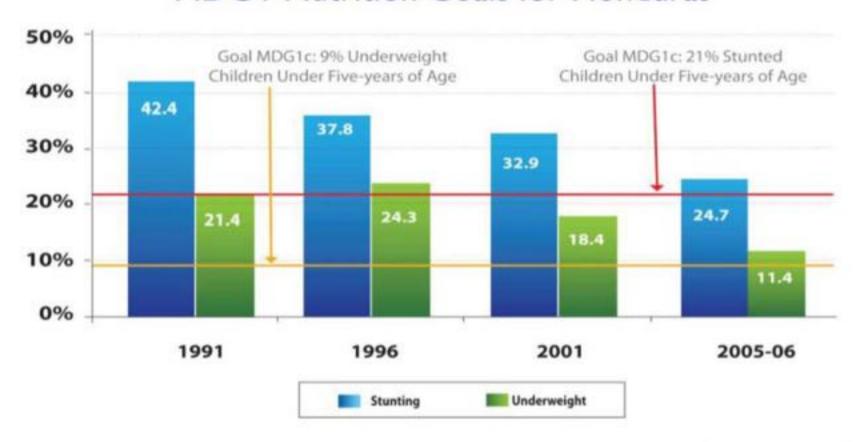

USG Strategic Decisions

Planned USG Investments

MDG1 Nutrition Goals for Honduras

Source: Ministry of Health (MOH)

USG Strategic Decisions

Adapting the FTF Initiative to the Honduran Context

I. Western Honduras has a serious, chronic food security problem

Food Security Situation

2. Adequate income to buy food is main constraint

Food Security Pillar

3. Two-pronged approach linked at the community level

Change Mechanism

4. Both income and nutrition gains are required for success

Desired Outcomes

Extreme Rural Poverty

Access and Availability

Subsistence Farmer Diversification into Market-led Agriculture

Increased Incomes

Chronic Rural Malnutrition

Utilization and Consumption

Improved Access to Basic Maternal and Child Health Services

Improved Nutritional Practices

USG Strategic Decisions

Planned USG Investments

The Government of Honduras has Demonstrated Commitment and Action Towards Achieving Long-term Development Goals

Demonstrated Commitment

1st Country Worldwide to Successfully Close Out an MCC Compact

- New IMF Stand-by Agreement September, 2010
- Multilateral bank financed Conditional Cash Transfer Program is GOH flagship poverty reduction investment
- President's Office created food security unit within Ministry of Presidency and civil society / government consultative mechanism
- Participation in Regional Congressional President's Food Security Initiative

Establishing a Firm Foundation

New National Development Plan

 Consolidates key national goals in one long-term strategic framework

National Food Security and Nutrition Strategy

- Multi-sectoral, inter-ministerial vision for integrating food security across the GOH
- Strong donor and civil society participation
- Launched November 10, 2010 by the Vice-President

National Agriculture Strategic Plan

- Specific planned results / investments in agriculture
- Four-year time frame (current administration)
- Being used as the basis for the food security Country Investment Plan (CIP)

USG Strategic Decisions

Planned USG Investments

FTF Initiative Aligned with GOH Agriculture Strategic Goals

GOH TARGETS TO BE ACHIEVED BY 2014	FTF ALIGNMENT
ncrease agricultural GDP to 23.4%	-
Reduce extreme rural poverty by 6%	~
Increase the value of horticulture and fruit exports by 40%	-
Increase annual coffee exports by 4%	~
Increase the production of basic grains by 10%	~
Increase irrigated land by 25%	V

Activities Associated with Achieving Targets are in Process of Being "Costed" and Funding Gap Determined with FAO Support

USG Strategic Decisions

Planned USG Investments

Honduras has an Active Donor Coordination Mechanism

- Created to Monitor GOH Commitments to Donors
- Engages in High-level Policy Dialogue with the GOH
- Includes Sector Specific Working Groups
- Actively Participates in Food Security Agenda
 - Reviewed national food security and agriculture strategies
 - Maps and aligns investments
 - Ensures mutual accountability

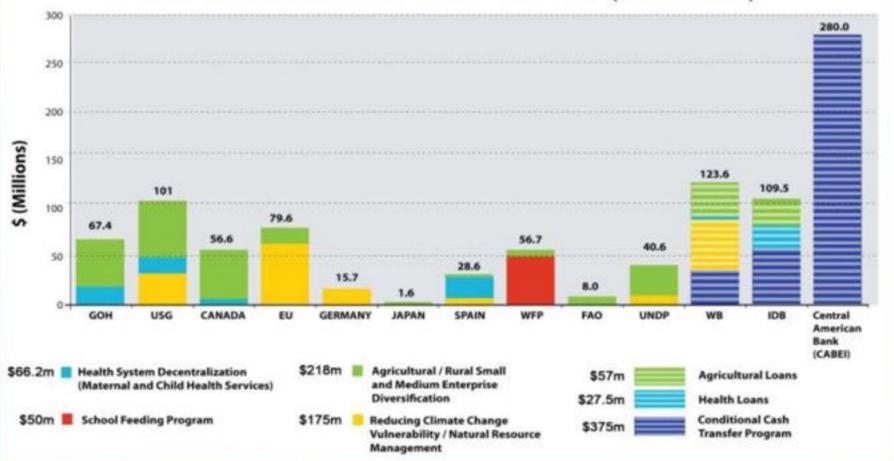

USG Strategic Decisions

Planned USG Investments

Donor Commitment to GOH Priorities (2010-2015)

USG Strategic Decisions

- Effective Poverty Reduction Programs
- **Education Sector Crisis Resolution**
- Enabling Environment for Economic Growth
- Health System Decentralization
- Fiscal Discipline
- Combating Corruption

USG Strategic Decisions

Planned USG Investments

USG Strategic Decisions

- Focus Geographically
- Apply Market-Driven Agricultural Approach
- 3. Select Highest Potential Value Chains
- Pursue Private Sector-Based Change Model
- Increase Basic Grain Productivity
- 6. Create Economic Opportunities for Women
- Decentralize Maternal and Child Health Services
- 8. Reduce Risks Associated with Climate Change

USG Strategic Decisions

Planned USG investments

Focus on the Main Food Insecure Region of Honduras (The West)

 Focused investment in the West will have the greatest impact towards achieving MDG1

 Working intensively in the poorest municipalities in the West leverages synergies between agriculture and nutrition interventions

Department	Population (2010)	Extreme Poor Population
Copan	362,226	170,845
Intibuca	232,509	154,464
La Paz	196,322	129,320
Lempira	315,565	235,437
Ocotepeque	132,453	45,246
Santa Barbara	402,367	232,454
Total	1,641,442	968,765

 Focusing geographically in the West will reduce transaction costs and thereby increase results per dollar invested

USG Strategic Decisions

Planned USG Investmen

The West has the Necessary Conditions for an Agricultural Based Poverty Reduction Strategy

Topography Land-use (Forest / Agriculture) Forests provide good water Mountainous terrain provides sources to supply drip varied micro-climates for a irrigation range of crop options Roads (Primary / Secondary) Relative proximity to major highways and markets

USG Strategic Decisions

Planned USG Investment

Opportunity to Maximize Returns on MCC Infrastructure Investments in the West

Productive Public Goods

Highway Segment and Secondary Roads

1. Small scale agricultural infrastructure in the West

- Integrated Production Systems
- Value Added Processing and Packaging
- Community Irrigation
- Water Harvesting
- Coffee Research Center
- Biological Control Laboratory

CA-5 highway upgrade provides improved access to markets

49.5 km of principal highway 45 km of secondary roads

USG Strategic Decisions

Planned USG Investments

Complementary Donor Investments Focused on the Most Food Insecure Regions (West and South)

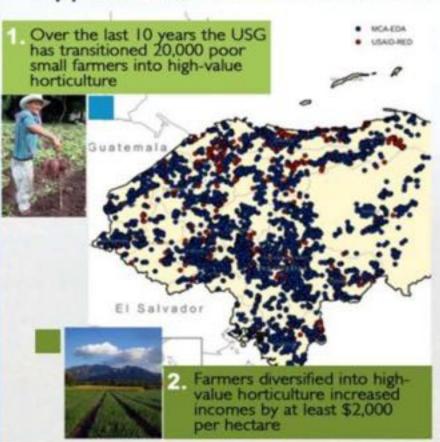

USG Strategic Decisions 2

Planned USG Investments

The USG Will Bring its Successful Market-Driven Agricultural Approach to the Extreme Poor

CARE
World Vision
International
ADRA
Save the Children

* Closed September, 2007

an important role in maternal

and child health services

Title II NGO programs targeted the

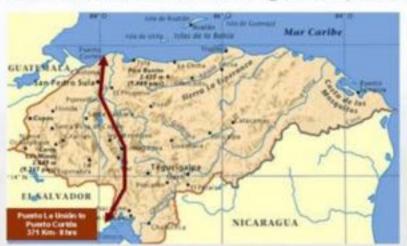

USG Strategic Decisions 2.

Planned USG Investments

Trade: Honduras has Good Access to its Most Important Markets

CAFTA

Provides permanent tariff free access to the U.S. and Central America for 95% of agricultural products

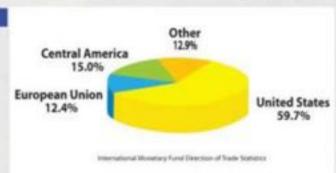

EU Trade Agreement

New Association Agreement provides preferential access to EU market

Transportation Corridor

Provides access to U.S., European and Asian Markets

Source: International Monetary Fund Direction of Trade Statistics, 2009

USG Strategic Decisions 3

Planned USG Investments

Focus on the Two Highest Growth Agricultural Products

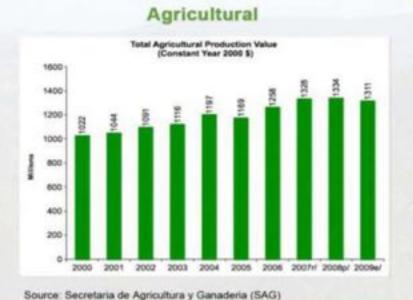

Suitable to the West

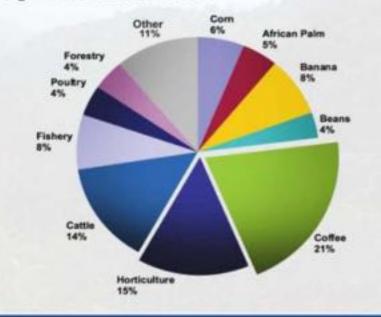

I. Vegetables and Fruits

2. Specialty Coffee

Agricultural Products' Contribution to Honduran Agriculture GDP 2000-2009

USG Strategic Decisions 3.

Planned USG Investments

Vegetable and Fruit Value Chain: The Best Market Opportunity for Raising Rural Household Income

Markets

- Consistent national, regional and international demand growth
- National and regional supermarket chain integration and growth represents an excellent long-term supplier opportunity
- Link small farmers to markets through broker / exporter supplier relationships

Production

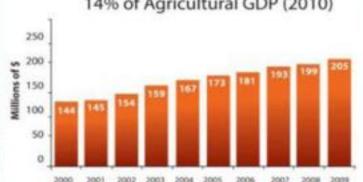

- Year-round production, multiple crop cycles
- Large number of crop options suitable for full range microclimates of the West
- Good agricultural practices, drip irrigation, and integrated pest management can be adapted to evolving market opportunities

Income

 Demonstrated capacity to generate a 40-200% increase in subsistence farmer household income and move them out of poverty

Source: Secretaria de Agricultura y Ganaderia (SAG)

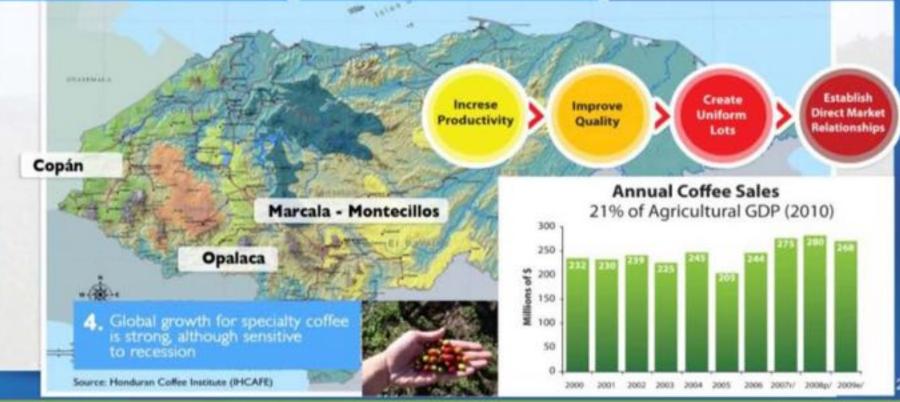

USG Strategic Decisions 3.

Planned USG Investments

Specialty Coffee Value Chain: Significant Unrealized Potential to Increase Incomes of the Poor in the West

- 80% of coffee in the West meets specialty market requirements, but only 10% is sold to the specialty market
- 2. A large number (50,000) of small coffee farmers live in target region
- Direct broker-retailer relationship provides price premium to farmer

USG Strategic Decisions 4

Planned USG Investments

Pursue a Private Sector Based Agricultural Change Model that Delivers Sustainability through Profits

- Assist small farmers to effectively respond to market standards
- R. W.

 Foster relationships with brokers to provide clear market signals to farmers on market standards

NGO Extension Support

Producer Association Farmer

Sector Associations

Financial Service Providers

Broker / Processor / Exporter

Input and Other Service Providers

Preferred Supplier Programs

> Wholesaler / Retailer / Supermarket

Develop strong market relationships to facilitate access to credit

Address value chain constraints through private sector policy advocacy

USG Strategic Decisions

Planned USG Investment

Leverage Agriculture Approach to Create Income Generation Opportunities for Women

On-Farm Agriculture Businesses:

- Women can be successful small farmers
- Support women interested in agriculture
- Adjust training approach to women's needs

Off-Farm Businesses (Ag-linked)

- Commercial agriculture generates new employment opportunities
- Seedling production, washing, sorting, value-added processing

Off-Farm Businesses (Other):

- Increased rural incomes generate new demand for goods and services in rural communities
- Create business opportunities, including: bakeries, tortilla making, other prepared food / micro-processing
- Businesses can be home based and have flexible labor demands

Income earned and controlled by women has a double development impact, as women are more likely than men to spend their income on family welfare investments (health, education, nutritious food)

USG Strategic Decisions 7.

Planned USG Investments

Support Ministry of Health (MOH) Decentralization of Child Nutrition and Growth Services to Increase Access and Reduce Costs

Traditional Centralized System

Central MOH Funds

MOH Run / Staffed Health Clinic

Rural MOH Health Services

New Decentralized System

Central MOH Funds

NGO Run / Staffed Health Clinic (GOH Contract)

Rural NGO Health Services (GOH Contract)

Coverage and cost of community-based child nutrition and growth services by service delivery model*

Model	Percentage Coverage	Annual Cost per Child in US\$
Decentralized	70.0	79
Centralized	50.8	92

Decentralized system has demonstrated improved health outcomes Strong community participation and social auditing = greater accountability and better quality of services Sustainability: Donor funded health services will be absorbed by MOH decentralization process

^{*} Ministry of Health, 2009

USG Strategic Decisions 7.

Planned USG Investments

Improved Health through Community-Based Integrated Maternal and Child Services

Improved Nutrition for Children Under 5

Exclusive breastfeeding for children under 6 months Appropriate feeding according to age Education of households in appropriate feeding behavior

Improved Maternal and Child Health Services

Improved prenatal and postnatal care Improved access to contraception Education for men and women on importance of birth spacing

Community-Based Risk Monitoring

Regular infant weighting

Monitoring of households with underweight and sick children Refer at-risk children to health units

USG Strategic Decisions 8

Planned USG Investments

Reduce Household Risk and Increase Economic Sustainability through Climate Change Mitigation Activities

- Promote on-farm environmental practices through existing agricultural extension providers
- 2 Improve enforcement of local natural resource management regulations
- Provide renewable energy to small rural businesses and public service providers (e.g., health clinics)
- Strengthen community disaster preparedness, including using cell phone based early warning system

USG Strategic Decisions

Planned USG Investments

USG Honduras FTF Baseline Scenario Illustrative Targets 2011-2015

Goal: Reduced Poverty (MDG1)

36,000 poor households (180,000 people) moved out of poverty 18,000 of these households (90,000 people) start from extreme poverty

Agriculture

New Net Small Business Sales: \$100 million

New Full-Time Equivalent Employment: 10,000 positions

New Business Investment: \$20 million

Nutrition

Stunting rate of 5 year-olds: 20% decrease*

Prevalence of underweight children: 20% decrease*

Prevalence of breast feeding of children under 6 months: 20% increase*

Honduras: The Perfect Time and Place for Feed the Future

- Honduras is one of the poorest countries in the hemisphere with 66% of its population food insecure.
- The 2009 coup d'état demonstrated the fragility of democratic institutions and the lack of public confidence in them.
- Food security is a critical piece of the Embassy Country Team's post-crisis response strategy by:
 - Supporting democratically elected President Lobo's GOH-led initiative to meet the needs of its poorest people
 - Thereby bolstering citizen support for, and faith in, democracy
- The GOH has demonstrated strong leadership on food security.
- Robust USG interagency and multilateral donor coordination support GOH food security leadership.
